

Reimbursement Code Information

Reimbursement Rates and Codes for Medicare Part B

When using this information, please note the following: Coding systems and reimbursement allowable rates vary by payer.

- Medicare Part B uses HCPCS (Healthcare Common Procedure Coding System) to group products.
- Medicaid systems vary by state; some use HCPCS while others use Product Reimbursement Codes or systems of their own. Contact your state provider for more information.
- Private health insurance and managed care companies may use HCPCS, Product Reimbursement Codes, or their own system. Contact your provider for more information.

Infant Nutritionals

Enfamil PREMIUM® Newborn
